

ID	Category	Story Title	User Story	Acceptance Criteria	Business Value	Time Estimation	Depends on	Duplicates	Sprint number	Status
2	Boards	List page	As a User, I want to have an overview of already created Boards, So that I can categorise my Cards underneath them later on.	Given my application server is started, When I open the root url (/), Then ensure I can see a list of my already created boards.	1000	3	1	-	1	To do
13	Authentication	User registration	As a User, I want to register a new account into the application, So I can access user related data later.	Given my application server is started, When I open the root url (/), Then ensure that there is a register link on the page, And ensure if I click on it, I see a registration page with a form where I can input my chosen username and password, And ensure if I click on the submit button, my username and password gets stored so I can login with these later.	700	1	1	-	1	To do
14	Authentication	User login	As a User, I want to login into the application with my username and password, So the application can identify who am I.	Given my application server is started, When I open the root url (/), And I haven't logged in already with my username and password, Then ensure that there is a "Login" button in the header, And when I click this button I see a login page where I can login with my username and password, And ensure if I enter the correct username and password then I see the the Boards' list page with public (and my previously created private) Boards.	700	1	1, 13	-	1	To do
16	Authentication	User logout	As a User, I want to be able to easily logout from the application,So my account can be locked and no-one can reach it, but me.	Given I'm logged in, Then ensure that there is a Logout link, And ensure if I click on it, I will be logged out of the application and see the Login button, And ensure I can only see public Boards.	700	1	1, 13, 14	-	1	To do
9	Cards	Order	As a User, I want to have a kept order between my cards, So I can set the priority between them.	Given I'm on the Boards list page, And there is a Board and multiple Cards saved in the system, When I drag a Card to above or below another Card, Then ensure the Card stays in the new position when I drop it, And when I refresh the page, Then ensure the order of the Cards are the updated, new order.	600	2	1, 2, 5/6	-	1	To do
10	Cards	Change status	As a User, I want to have statuses for my cards, represented by static/dynamic columns, So that I can set the progress of the Cards.	Given I'm on the Boards list page, And there is a Board and a Card saved in the system, And ensure I can drag and drop a Card from one column to another, Then ensure the Cards are the updated status.	600	2	1, 2, 5/6	-	1	To do

5	Boards	Static columns	As a User, I want to open a Board. So I see 4 fix columns.	Given I'm on the Boards list page, And there is a Board saved in the system, When I click on it, Then ensure I get 4 columns (New, In progress, Testing, Done), as status of Cards, And ensure I can still see the Board's title on the top, And ensure if I click the Board title again, this Board closes.	300	2	1, 2	6	1	To do
4	Boards	Rename Board	As a User, I want to change the title of any Boards.	Given I'm on the Boards list page, And there is a Board saved in the system, When I click on it's name, Then ensure the name changes to an input box, And ensure if I click on it, I can give my new Board's title, And ensure if I press save, my Board gets saved, And ensure it gets displayed in my Board list, And ensure if I reload the page, my Board is still displayed	200	2	1, 2	-	1	To do
7	Boards	Rename Column	As a User, I want to change the title of a Column.	Given I'm on the Boards list page, And there is a Board saved in the system, that has columns (static or dynamic), When I click the title of the Column, Then ensure the title text changes to an editable field, And ensure if I press Enter, my Column title gets saved, And ensure if I click out from the editable area or press Esc, the original Column title returns, And ensure if I reload the page, my Column is still display the updated title.	200	1	1, 2, 5/6	-	1	To do
1	Development	Create a development environment	As a Developer, I want to have an environment, where a web-server serves a static HTML, So that I can avoid issues with running JavaScript locally in a sandboxed environment.	Given I start up the application server, When I open localhost on the port it's running in my browser, Then ensure the server gives back a valid (empty HTML) response.		2	-	-	1	To do
	Development	Create database	As a Developer I want to be able to manage data using database		1000	3	1	-	1	To do
